Post Illness Convalescence Care and Respite Care

Convalescence Care is designed to provide an important transitional phase immediately after discharge from hospital. Ageing may cause your health to decline and often minor ailments can result in hospital visits for diagnostic testing or treatment.

Respite Care is designed to offer a short stay respite period for you, your family and/or professional carer. A medical referral is not required and you are welcome to arrange respite care directly with us. Most respite stays are agreed in advance and the care period can be as long or short as you wish, subject to accommodation availability.

Following a convalescence care period you will be consulted on whether you wish to return home or avail of our continuing care options.

Menu & Nutrition

Our chefs pride themselves on providing local quality seasonal food every day. Menus are designed to meet the nutritional needs of all residents and our catering staff can provide for any special dietary requirements. A daily choice of specially prepared meals will be offered. We at Ratoath Manor Nursing Home pride ourselves on a complete dining experience for our residents.

OUR Ethos of Care

Silver Stream's central ethos is to provide quality person centred care, where residents are offered choice in their way of life and are consulted and participate in decisions regarding their care. Our vision is to create an environment where residents are supported and encouraged to retain their highest level of ability, autonomy and independence. We very much embrace the changing cultures of care, transitioning away from a medical model towards care that is not only person centred, but also person directed.

Our Team

Our Team at Silver Stream all have extensive experience in the provision of both long and short term care. The team is personally selected to cater for the individual needs of our residents. These standards of care create a level of warmth and compassion.
